Eclipses 1926

There will be two eclipses in 1926, as follows:

I. Total of the Sun January 13-14. Visible in Africa, Southern Asia, Indian Ocean and Polynesia.

II. Annular of the Sun July 9-10, the annular phase belt not touching land in its course through the Southern Pacific. The partial phase will be slightly visible in the Southern and Pacific States near sunset of the 9th.

THE PLANETS

MERCURY, Brightest as an evening star March 3rd to 12th. As a morning star, Aug. 25th to Sept. 5th and Dec. 7th to 12th. Best seen in the morning and evening twilight.

VENUS, Brightest as an evening star January 1st to 5th becoming faint the last of January and invisible early in February, then at her brightest again as a morning star near the middle of March.

MARS, Rather dim as a morning star at the first of the year, increasing slowly in brightness until about November 4th, when brightest, rising at sunset and shining all night. Becomes an evening star July 8th.

JUPITER, Too close to the Sun to be well seen until March when a morning star, remaining such until May 17th, after which he will be an evening star to the end of the year being an all-night star, and rising sunset July 10th to 20th.

SATURN, A morning star from Jan. 1st to Feb. 15th, after that an evening star until Nov. 21st, being an all-night star through most of May. Will be dim in October and December, and invisible in November.

URANUS, Brightest in September and October.

NEPTUNE, Brightest in February.

Barometer

A RISING BAROMETER

A rapid rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.

A rise with southerly winds indicates fine weather.

A STEADY BAROMETER

With dry air and seasonable temperature indicates a continuance of very fine weather.

A FALLING BAROMETER

A rapid fall indicates stormy weather.

A rapid fall with a westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in summer, and snow in winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

To Tell Time of Tide

Rules for Computing Interest

The following will be found to be excellent rules for finding the interest on any principal for any number of days. When the principal contains cents, point off four places from the right of the result to express the interest in dollars and cents. When the principal contains dollars only, point off two places.

Four per Cent.—Multiply the principal by the number of days to run, and divide by 90.

Five per Cent.—Multiply by number of days, and divide by 72.

Six per Cent.—Multiply by number of days, and divide by 60.

Seven per Cent.—Multiply by number of days, and divide by 52.

Eight per Cent.—Multiply by number of days, and divide by 45.

Nine per Cent.—Multiply by number of days, and divide by 40.

Ten per Cent.—Multiply by number of days, and divide by 36.

Twelve per Cent.—Multiply by number of days, and divide by 30.

Fifteen per Cent.—Multiply by number of days, and divide by 24.

Eighteen per Cent.—Multiply by number of days, and divide by 20.

Twenty per Cent.—Multiply by number of days, and divide by 18.

Twenty-four per Cent.—Multiply by number of days, and divide by 15.

The Metric System

The Metric System of Weights and Measures has been legalized by act of Congress, July 18, 1896.

METRIC WEIGHTS.—10 milligrams make 1 centigram, 10 centigrams 1 decigram, 10 decigrams 1 gram, 10 grams 1 dekagram, 10 dekagrams 1 hektogram, 10 hektograms 1 kilogram, 1000 kilograms 1 metric ton.

METRIC MEASURES.—(One milliliter equals cubic centimeter.) 10 milliliters make 1 centiliter, 10 centiliters 1 deciliter, 10 deciliters 1 liter, 10 liters 1 dekaliter, 10 dekaliters 1 hektoliter, 10 hektoliters 1 kiloliter.

METRIC LENGTHS.—10 millimeters make 1 centimeter, 10 centimeters 1 decimeter, 10 decimeters 1 meter, 10 meters 1 dekameter, 10 dekameters 1 hektometer, 10 hektometers 1 kilometer.

APPROXIMATE EQUIVALENTS.

A meter is about a yard; a kilo is about 2 pounds; a liter is about a quart; a centimeter is about ½ inch; a metric ton is about same as an ordinary ton; a kilometer is about ¾ mile; a cubic centimeter is about a thimbleful. A nickel five-cent piece of our coinage is a handy key to metric measures and weights. It is two centimeters in diameter and weighs five grams.

PRECISE EQUIVALENTS.

1 acre equals 4047 hectars; 1 bushel, 35.24 liters; 1 centimeter, .3937 inch; 1 cubic centimeter, .0610 cubic inch; 1 cubic foot, .0283 cubic meter; 1 cubic inch, 16.39 cubic cent.; 1 cubic meter, 35.32 cubic feet; 1 cubic meter, 1.358 cubic yards; 1 cubic yard, .7645 cubic meter; 1 foot, 30.48 centimeters; 1 gallon, 3.785 liters; 1 grain, .0648 gram; 1 gram, 15.43 grains; 1 hectare, 2.471 acres; 1 inch, 25.40 millimeters; 1 kilogram, 2.200 pounds; 1 kilometer, .6213 mile; 1 liter, .9081 quart (dry); 1 liter, 1.057 quart (liquid); 1 meter, 3.281 feet; 1 mile, 1.609 kilometers; 1 millimeter, .0394 inch; 1 ounce (avd.), 28.35 grams; 1 ounce (Troy), 31.10 grams; 1 peck, 8.809 liters; 1 pint, .4732 liter; 1 pound, .4536 kilogram; 1 quart (dry), 1.104 liters; 1 quart (liquid), .9464 liter; 1 sq. centimeter, .1550 sq. inch; 1 sq. foot, .0929 sq. meter; 1 sq. inch, 6.452 sq. cent.; 1 sq. meter, 1.196 sq. yards; 1 sq. meter, 10.76 sq. feet; 1 sq. yard, .8361 sq. meter; 1 ton (2000 lbs.), .9072 metric ton; 1 ton (2240 lbs.), 1.016 metric ton; 1 ton (metric), 1.102 ton (2000 lbs.); 1 ton (metric), 2.204 ton (2240 lbs.); 1 yard, .9144 meter.

SMALL CRAFT, STORM AND HURRICANE WARNINGS.

Small Craft Warning. N. E. Winds. S. E. Winds. N. W. Winds. S. W. Winds. Hurricane.

SMALL CRAFT WARNING.—A red pennant indicates that moderately strong winds are expected.

STORM WARNINGS.—A red flag with a black center indicates a storm of marked violence. The pennants displayed with flags indicate direction of wind—red, easterly; white, westerly; pennant above flag indicates wind from northerly quadrants; below, from southerly quadrants.

By night a red light indicates easterly winds, white light below red, westerly winds. Two red flags with black centers indicate approach of tropical hurricanes.

No night small craft or hurricane signals are displayed.

Help in Case of Accidents

BURNS AND SCALDS.—Cover with cooking soda and lay wet cloths over it. Whites of eggs and olive oil. Olive oil or linseed oil, plain, or mixed with chalk or whiting. Sweet or olive oil and lime-water. Shock, which is always present in severe burns, requires the administration of stimulants. Pain is more constant and intense in burns than in any other form of injury, and requires sedatives, which should be administered by the medical attendant. Later on the appearances of inflammation and other complications are to be carefully watched for.

SUFFOCATION FROM INHALING ILLUMINATING GAS.—Get into the fresh air as soon as possible and lie down. Keep warm. Take ammonia—twenty drops to a tumbler of water, at frequent intervals; also, two to four drops tincture of nux vomica every hour or two for five or six hours.

TESTS OF DEATH.—Hold mirror to mouth. If living, moisture will gather. Push pin into flesh. If dead, the hole will remain; if alive, it will close up. Place fingers in front of a strong light. If alive, they will appear r. l.; if dead, black or dark.

MAD DOG OR SNAKE-BITE.—Tie cord tight above wound. Suck the wound and cauterize with caustic or white-hot iron at once, or cut out adjoining parts with a sharp knife. Give stimulants, as whisky, brandy, etc.

FIRE IN ONE'S CLOTHING.—*Don't run*—especially not downstairs or out-of-doors. Roll on carpet, or wrap in woollen rug or blanket. Keep the head down, so as not to inhale flame.

FIRE FROM KEROSENE.—*Don't use water*, it will spread the flames. Dirt, sand, or flour is the best extinguisher, or smother with woollen rug, table-cloth, or carpet.

CINDERS IN THE EYE.—Roll soft paper up like a lamp lighter, and wet the tip to remove, or use a medicine dropper to draw it out. Rub the other eye.

FAINING.—Place flat on back; allow fresh air, and sprinkle with water. Place head lower than rest of body.

STINGS OF VENOMOUS INSECTS, ETC.—Apply weak ammonia, oil, salt water, or iodine.

LIGHTNING.—Dash cold water over a person struck.

Help in Case of Accidents

DROWNING.—1. Loosen clothing, if any. 2. Empty lungs of water by laying body on its stomach, and lifting it by the middle so that the head hangs down. Jerk the body a few times. 3. Pull tongue forward, using handkerchief, or pin with string, if necessary. 4. Imitate motion of respiration by alternately compressing and expanding the lower ribs, about twenty times a minute. Alternately raising and lowering the arms from the sides up above the head will stimulate the action of the lungs. Let it be done gently but persistently. 5. Apply warmth and friction to extremities. 6. By holding tongue forward, closing the nostrils, and pressing the "Adam's apple" back (so as to close entrance to stomach), direct inflation may be tried. Take a deep breath and breathe it forcibly into the mouth of patient, compress the chest to expel the air, and repeat the operation. 7. **DON'T GIVE UP!** People have been saved after HOURS of patient, vigorous effort. 8. When breathing begins, get patient into a warm bed, give WARM drinks, or spirits in teaspoonfuls, fresh air, and quiet.

SUNSTROKE.—There are two important indications for treatment—reduction of temperature and the use of stimulants. The patient should first be removed to a cooler spot if possible, or at least where shade can be secured. The treatment should be begun at once. The clothing about the neck and body must be either loosened or removed. Cold is particularly indicated in cases where there is great heat of the body, and delirium and convulsive movements are present. This means of reducing the temperature may be applied in the shape of cracked ice about the head and spine, or the use of cold water. If the heat of the body is very great, it may be necessary to wrap the patient in sheets wet with cold water. If there is, besides the great heat, evidence of serious depression, stimulants must be used while the cold is being applied.

HEMORRHAGE.—The usual treatment is rest in the recumbent position; small pieces of ice should be freely swallowed, and the application of ice wrapped in a towel or in an ice-bag, or snow, cold water, etc., over the stomach; hot applications may be applied to the extremities.

FIRE IN A BUILDING.—Crawl on the floor. The clearest air is the lowest in the room. Cover head with woollen wrap, wet if possible. Cut holes for the eyes. *Don't get excited.*

Poisons and Antidotes

FIRST.—Send for a physician.

SECOND.—**INDUCE VOMITING**, by tickling throat with feather or finger. Drink hot water or strong mustard and water. Swallow sweet oil or whites of eggs.

Acids are antidotes for alkalis, and vice versa.

ACIDS, MINERAL.—Chalk, magnesia (plaster off wall in emergency), solution carbonate of soda, emollient drinks, fixed oils.

ACID, CARBOLIC.—Any soluble sulphate, such as magnesia.

ACID, HYDROCYANIC.—Fresh air and artificial respiration, with cold effusion. Ammonia by inhalation and intravenously in vein of leg.

ACONITE.—Emetics, stimulants, external and internal, keep up external heat, keep flat on back.

ANTIMONY TART.—Vegetable acids, such as tannic acid, catechu.

ARSENIC.—Freshly precipitated hydrated sesquioxide of iron made by adding magnesia to any iron solution.

ATROPIA.—Same as Belladonna.

BELLADONNA.—Emetics—mustard flour in water; give physostigma or pilocarpine if cold to head.

CANTHARIDES.—Emetics, emollient drinks, oplates by mouth and rectum, large draughts of water to flush kidneys.

CHLORINE WATER.—Albumen, white of egg, milk sour.

CHLOROFORM.—Fresh air, artificial respiration (inclining head down, pull tongue forward), brandy and ammonia intravenously in leg, the **HYPODERMIC** injection of 15 m. tincture of digitalis and 1-60 of a grain of atropine.

COLCHICUM.—Emetics, followed by demulcent drinks. If coma be present brandy, ammonia, coffee. Opium in large dose. Keep up external heat.

CONIUM.—Emetics, followed by stimulants external and internal.

CORROSIVE SUBLIMATE.—Albumen, white of egg (4 gr. sublimate require white of one egg), flour, milk. Equal parts of lime water and milk. Emetics, or evacuate stomach by pump.

Poisons and Antidotes

COPPER SULPH.—Yellow prussiate of potash or soap.
CROTON OIL.—Emetics; wash out stomach, followed by mucilaginous fluids, containing opium.

DIGITALIS.—Recumbent posture after emetics. Emetics and opium; give tincture aconite.

ELATERIUM.—Demulcent drinks, enemata of opium, and external heat.

HYOSCYAMUS.—Stomach pump, emetics, stimulants external and internal, physostigma and pilocarpine.

ILLUMINATING GAS.—Hypodermic injections of nitroglycerin are recommended by Kloman, of Baltimore.

IODINE.—Emetics and demulcent drinks, starch or flour dissolved in water, opium and external heat.

LEAD SALTS.—Any soluble sulphate, either magnesia or soda, succeeded by emetics, and afterwards by opium and milk.

LOBELLA.—Stimulants externally and internally; external heat.

MORPHINE.—Same as opium.

NUX VOMICA.—30 grs. of chloral and 60 grs. of bromide of potash. Nitrite of amyl.

OPIUM.—Atropine hypodermically till respirations number 8 per minute. Stomach pump, stimulants, external and internal, brandy and coffee, cold effusion, ammonia to nostrils, galvanic shocks, compelling to move about, artificial respiration, electric brush. Permanganate of Potash.

OXALIC ACID.—Lime, not potash or soda.

PHOSPHORUS.—Sulphate of copper in emetic dose as chemical antidote. No oils. Emetics and purgatives.

POTASH AND SODA SALTS.—Dilute acetic acid, citric acid, lemon juice, fixed oils, demulcents, vinegar.

SILVER NITRATE.—Solution of common salt and demulcent drinks. Emetics.

STRAMONIUM.—Same as Belladonna.

STRYCHNINE.—Same as Nux Vomica.

TOBACCO.—Emetic, stimulants, external and internal, strychnine, external heat.

ZINC SALTS.—Carbonate of soda, emetics, warm demulcent drinks.

ELEANOR MARQUAND ENGAGED TO MARRY

Daughter of Late Archaeologist
to Wed George Howard
Forsyth Jr.

THEKLA WIGAND BETROTHED

New York Girl to Wed Barthelemy
Lachelier of French Embassy—
Other Engagements.

Special to The New York Times.

PRINCETON, N. J., Dec. 5.—Mrs. Allan Marquand announces the engagement of her daughter, Miss Eleanor Marquand, to George Howard Forsyth Jr., the son of Mr. and Mrs. George H. Forsyth of Burlingame, Cal., and grandson of Mr. and Mrs. Henry Hazlitt of Chicago.

Miss Marquand is the daughter of the late Professor Allan Marquand of Guernsey Hall, Princeton. Professor Marquand was recognized as the dean of American archaeologists and was largely responsible for founding and developing the Princeton School of Art and Archaeology. Professor Marquand and his family gave Marquand Chapel to Princeton University.

Miss Marquand was graduated from Bryn Mawr College, of which she is Corresponding Secretary of the Alumnae Association. She has traveled extensively in Europe and the Near East, and spend one Winter in work for the Bureau of Part Time Workers in New York City. She is the granddaughter of the late Mr. and Mrs. Henry G. Marquand and Richard James Cross of New York City and Mrs. R. J. Cross of Princeton.

Mr. Forsyth, who is a graduate student at the School of Art and Archaeology in Princeton, was graduated from the university with honors in 1923. While an undergraduate he was on The Princetonian and publicity manager of the Triangle Club, and was a member of Cap and Gown Club.

The wedding will unite two families whose sons have been Princeton graduates for several generations.

Lachelier.

Buys Insurance Business

The insurance business of the late Harry Fenlon, of Bellefonte, was sold on Thursday, of last week, to Hugh Quigley, son of the late Judge and Mrs. Henry C. Quigley. The consideration is reported to be around \$7,000. The business was sold through the medium of sealed bids and it is understood that fully twenty bids were submitted by local and Centre county aspirants. Mr. Quigley is an ambitious young man of sterling qualities and should succeed in this venture. He has been employed for the past year as kiln manager for the White Rock Quarry Company and will be succeeded by Fred Craft, of Bellefonte, a former American Lime & Stone Co. plant foreman.

Monkey Bolts Party; Guests Search Roofs

Charles V. Miller's "Bobby" Breaks Bed Post Tether and Peace of Dinner; He Turns Up at a Neighbor's

Bobby, a black spider monkey from South America, got out of Charles V. Miller's house at 9 East Fifty-fifth Street last night to the consternation of Mr. Miller and a score or so of guests who were dining with him, and got into the home of William C. Roberson, at 19 East Fifty-fifth Street, to the almost equal consternation of Mr. Roberson and his son.

Mr. Miller's party was in celebration of his election to the Legion of Honor for his contribution to relief work in France during the war. One of his guests was Alice Gentle, of the Metropolitan Opera Company.

Because of the dinner party Mr. Miller had permitted his son, Bobby, ten years old, to stay up beyond his usual bedtime and entertain Bobby the monkey. About 10 o'clock, however, Bobby the boy went to bed, tying Bobby the monkey to his bedpost. An hour later Mr. Miller decided to exhibit Bobby the monkey to his guests and sent a servant upstairs for the animal.

Guests Join Hunt

The servant returned without it. The monkey's leash was broken, he reported, the window was open and the monkey was gone. Mr. Miller was aghast. He foresaw the grief that would be voiced when Bobby the boy awoke and found Bobby the monkey gone. His guests promptly volunteered to go on a monkey hunt with him.

While a servant telephoned news of the tragedy to the East Fifty-first Street police station, men and women in evening dress tramped through East Fifty-fifth Street, persuading owners of residences and superintendents of apartment houses to let them carry the hunt to the roofs.

The hunt attracted no little attention, but far less than would have been the case had the by-passers placed any credence in the replies they got to their questions.

Prowl Roofs in Evening Dress

"What's up?" the man in the street would ask a doorman or a private watchman as he saw white shirt bosoms and silken-scarfed feminine shoulders prowling along the edges of roofs.

"Just a monkey hunt," the doorman or watchman would reply and the interrogator would go his way somewhat vexed and convinced that at most it was merely a treasure hunt.

Among the homes to which no word of the excitement penetrated was that of William C. Robertson, on the fifth floor of 19 East Fifty-fifth Street.

Mr. Roberson and his son, William

C. jr., were discussing the agricultural situation in the West when William C. jr.'s attention began manifestly to waver and his gaze became fixed and staring.

Mr. Roberson sr. turned and beheld a black spider monkey standing in a Napoleonic attitude, one hand clutched to its breast, just behind his chair.

"A monkey!" ejaculated Mr. Roberson sr.

"I knew it was, all the time," asserted Mr. Roberson jr., but with an air of relief, nevertheless.

They telephoned to the police, and Patrolmen Broderick and Mitchell, who had joined the monkey hunt, came and got Bobby the monkey and took him home, where he was tethered to the post of Bobby the boy's bed.
